

Powering the future!

Concerned about your growing superhero?
PET can lend a helping hand!

The PrePrimary Evaluation Team, or PET, provides free assessments for children ages 3-6. If you think your preschooler is falling behind, a PET assessment can identify delays and the services or resources that will help. Early intervention gives little learners a big boost – in school and in life!

A PET assessment looks for potential delays in the following developmental areas:

- Speech and Language
- Social and emotional
- Vision
- Hearing
- Gross Motor
- Fine Motor
- Problem-solving
- Self-help

Don't wait if you suspect your child may have a developmental delay. PET assessments are FREE to all Kalamazoo county residents. Request an appointment online at kresa.org/PET or call (269) 250-9670.
